Estimating Residential: Construction, Roofs & Metal Sheathing

Date: September 24 – September 25, 2025 (2 day course)

Time: 8:30 am – 4:00 pm

Location: BSIA Office, 19299 94 Ave, Surrey, BC V4N 4E6

Estimating for Residential Construction covers all the basics of estimating residential construction starting from the ground up. This includes disclaimers, walls, roofing systems, metal sheathing and reading and understanding blueprints. Attendees are provided with a step-by-step workbook to assist them through the course. The workbook is theirs to keep for future reference.

Who Should Attend? It is recommended that estimators who frequently produce estimates for houses should attend this course.

Objectives:

1. Acquire a good understanding of building practices.
2. Gain knowledge of products used in home construction.
3. Learn to produce accurate and professional estimates.

Course Outline

Introduction: Learn how to read a residential blueprint; learn the basics sections of house construction.

Clarification of Terminology: The attendees will be taken through all necessary terminology to complete the course.

- Introduction, skill-set required, course objective
- Structural specifications
- Calculating waste factors
- Reading & understanding blueprints
- Foundation, beams, floor systems, stairs, roof system
- Interior walls, interior components
